Highly motivated and performance-driven **MERN Full Stack Developer** with hands-on experience building scalable, secure, and responsive web applications from concept to deployment. Proven track record across multiple software engineering internships developing reusable React.js frontend structures, high-performance Node.js/Express.js REST APIs, and optimized MongoDB schemas. Combines deep JavaScript expertise with strong foundational knowledge of Java, Spring Boot, Data Structures, and OOP principles to deliver clean, maintainable, and reliable digital solutions.

Technical Skills

Frontend:	React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery
Backend:	Node.js, Express.js, Java, Spring Boot, Servlets, MVC Architecture
Databases:	MongoDB (Mongoose, query optimization, indexing), SQL, Relational Databases
Core CS:	Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPs), Operating Systems
Tools:	Git, GitHub, RESTful APIs, JWT Authentication, JSON, API Testing, Agile Methodologies

Professional Experience & Internships

Cubiksoft Technologies Full Stack Developer Intern (MERN)	Tamil Nadu, India Dec 2024 – May 2025
- Engineered responsive UI components utilizing React.js, Bootstrap, and Redux, improving visual flow and interactivity. - Built and integrated secure Node.js/Express.js APIs with MongoDB, utilizing custom JWT authentication middleware. - Optimized database storage architectures, writing efficient MongoDB aggregation queries to speed up server response times.	
Codsoft React JS Developer Intern	Remote, India Sep 2024 – Nov 2024
- Crafted robust frontend styles and dynamic interfaces using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility. - Integrated client-side UI with backend database endpoints, conducting detailed debugging to reduce API latency. - Leveraged state management techniques and optimized rendering lifecycles to reduce visual component load times by 25%.	
Corizo Full Stack Developer Intern	Remote, India Mar 2024 – May 2024
- Developed and refactored modular backend logic and processing flows utilizing Java, Servlets, and OOP principles. - Collaborated with engineering teams on database schema structuring, entity relations, and client-server integration. - Authored backend unit tests and mock integration cases, resolving 15+ edge-case issues to improve transaction safety.	
InternPe Java Developer Intern	Remote, India Dec 2023 – Feb 2024
- Developed and unit-tested functional Java components using Object-Oriented Analysis to achieve execution integrity. - Utilized fundamental search, sorting, and data structure models to design reliable local backend tracking scripts.	

Key Projects

Nexus Product Inventory App (MERN Stack)
- Developed a full-stack inventory platform enabling real-time stock tracking, improving inventory tracking accuracy by 99%. - Optimized MongoDB collections by indexing search criteria fields, reducing query lookup latencies by over 40%. - Designed an interactive analytics dashboard featuring clean chart visualizations, boosting decision-making speed by 25%.
High-Performance E-Commerce Platform (MERN Stack)
- Built a scalable storefront with product browsing, dynamic filtering, secure mock payment, and user role systems. - Utilized Redux to manage global application state, reducing UI re-rendering overhead by 30%. - Secured operations and user privacy by implementing backend validations and Bcrypt-encrypted password storage.
AI-Powered Budget & Expense Tracking System
- Designed an automated personal finance planner tracking cash flows with a 95% budget categorization precision rate. - Integrated analytics using custom JavaScript algorithms, slashing manual user entry effort by 50%.

Education

Karpagam College of Engineering Bachelor of Engineering (B.E.) in Electronics and Communication Engineering	Coimbatore, Tamil Nadu 2021 – 2025
---	---------------------------------------

Certifications

MERN Stack:	Modern React.js architectures, secure Node.js, Express.js microservices, and MongoDB modeling.
Web & React:	Modern Web Development, responsive UI design, Redux state management, and component lifecycles.
Java & IoT:	Java Servlets & Enterprise Architecture, operating systems, and hardware-software system integration.
